ASPHALT G-11

Asphalt G-11

Superior alternative material for road construction and improvements with exceptional environmental and economical advantages

What is ASPHALT G-11?

G-11 is a natural asphalt mixture, also known as asphaltite or natural asphalt.

It is a material composed mainly of fine sand of crude oil “naturally refined”. It is an innovative product that provides alternative technologies of asphalt construction (cold or warm) with fine technical quality and greater protection of the environment.

ASPHALT G-11

In its natural deposit

ASPHALT G-11

- Type 1: >13% Asphalt content
- Type 2: 10% ~ 13% Asphalt content
- Type 2A: 8% ~ 10% Asphalt content
- Type 2B: <8% Asphalt content

ASPHALT G-11

Cold method application

High temperature method

Combination
Hot & cold method

ASPHALT G-11

Quality control field laboratory

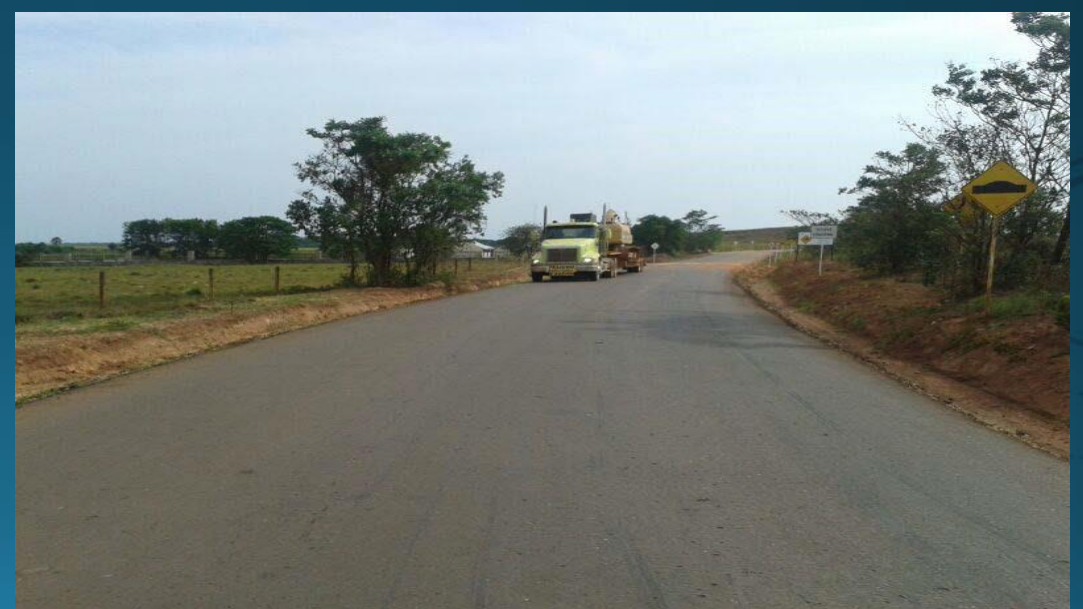

ASPHALT G-11

Examples of applications

Recovery of a damaged concrete pavement, 2 year contract

Road work

Paving of company roads for the oil fields of Mansarovar Energy

Recovery of a segment of “Ruta del Sol” (Main Highway)

Road repairs

Manual application and compaction of Asphalt G-11 at the Mesa de los Santos
